**Russian delegation expert support while International Forum on policy in telecommunication of Geneva as well as while preparation of Russian Federation position on Internet management while counselings of Russia's joining OECD**

**Counselings of Ministry of Communication on theoretical and practical issues in Internet management sphere**

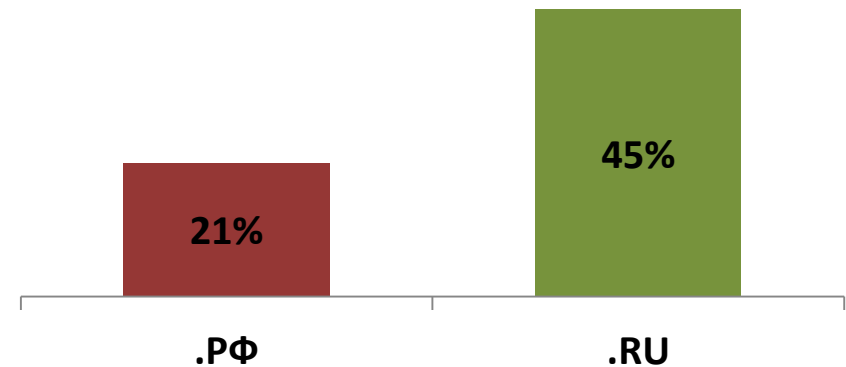

**.РФ is one of the largest IDN-domains in the world:**

**813 400 domain names (for September 1, 2013)**

The amount of delegated domains

The amount of the domains with working sites

## The main problem

**Lack of support of cyrillic domains by the largest main services:  
it's impossible to send a letter for an email address  
such as following `имя@домен.рф`**

## AGAINST:

- E-mail functions of the IDN-domains are not in demand so it's too early to speak about cyrillic email support

## FOR:

- .PФ Domain exists for more than 3 years and it's compatible with existing ccTLD on growth speed
- Russian is the second popular language in the world
- In the nearest future the following top level domains will appear: .PУC, .MOCКBA (“Moscow”), .ДЕТИ (“children”), .ОНЛАЙН (“online”), .САЙТ (“site”) etc.

# Universal IDN acceptance

Coordination Center addressed Microsoft and Facebook asking for a favor to provide email addresses in .PΦ zone and other non-latin domain support

1

**A principal agreement to improve email services and other products is received!**

A favor for email addressed in .PΦ zone and other non-latin domains support was sent to the biggest e-mail services

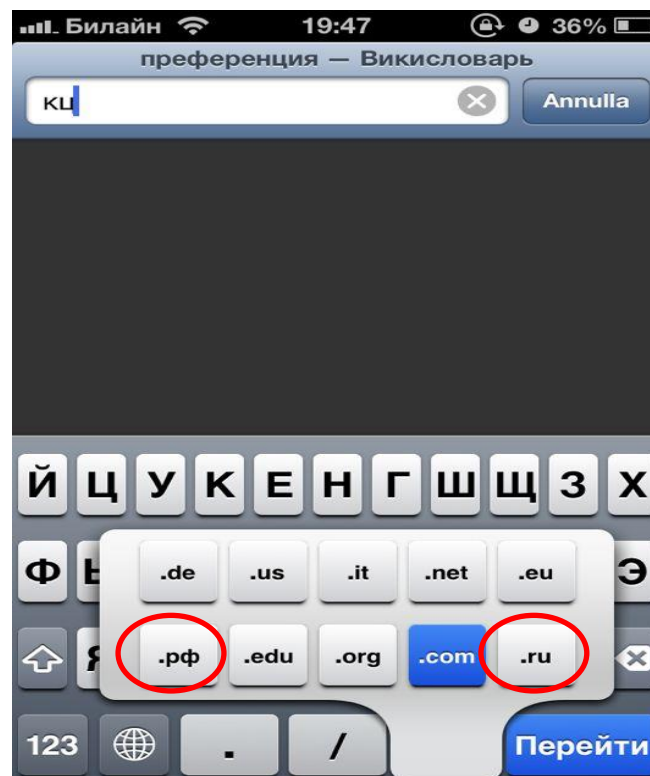

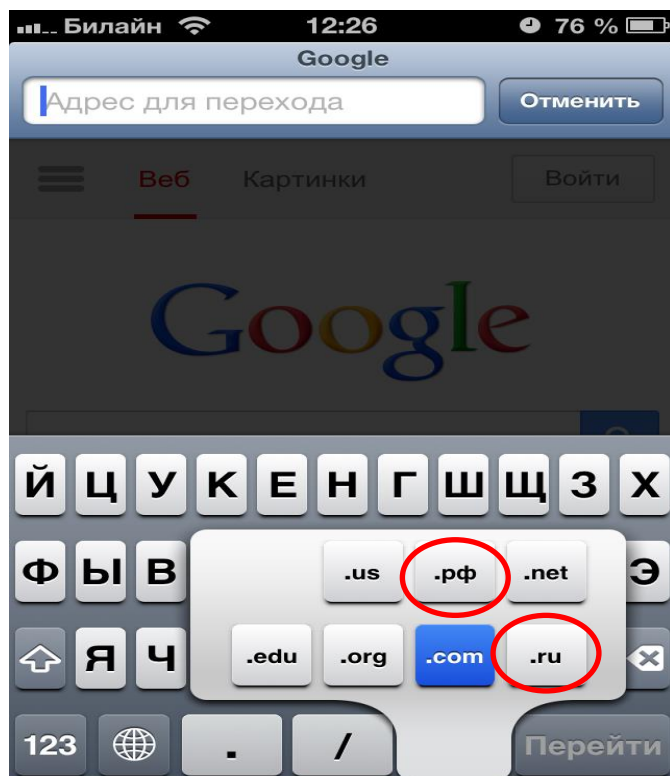

2

**There are active negotiations on starting work on a new protocol launch which will allow to send and receive letters from cyrillic addresses!**

# Universal IDN acceptance

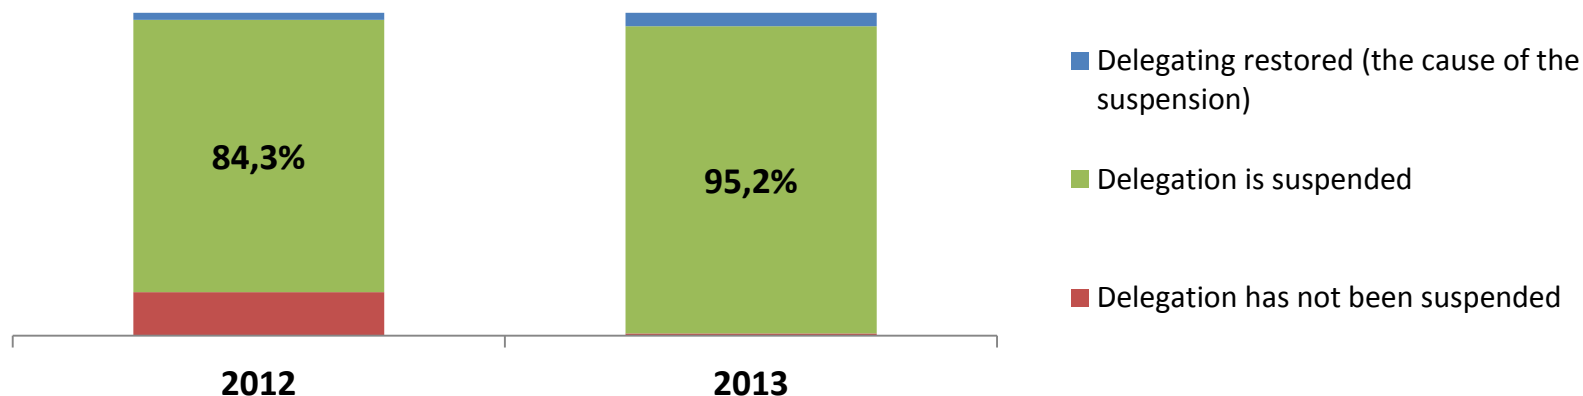

Apple added new domain zones including .RU and .PФ on standard iPhone keyboard

3

- Cooperation with organizations competent in violation definition in Internet continues

- A specialized platform is being executed for collecting and analysing data on domain names in .RU and .PΦ domains which are used for placing “malefactors” in Internet resources
- Web-site for informational, inquiry and analytical materials on “malefactors” distribution issue publication development has started. Online service on domain name check for using “malefic” activity will be organized as well

# Education initiatives

In the frames of a forum **RIF+KIB** Coordination Center held a demonstration tournament **“Study the Internet, Govern It”** with participation of more than 50 people

Coordination Center and Technical Center Internet held a session in the **Russian Court** on intellectual rights telling the judges about peculiarities of legal norms in **Global Net** application
